Wireless Alarm System SC-Series

Protects you and your family.

No Contract. No Monthly Fees.
Automatically calls for help in the event of emergency.

Features

Wireless Panel Sensors

When a sensor is triggered, a wireless signal is sent to the Control Panel and that sets off the alarm.

No Contract

We never make you sign any kind of contract or pay monthly fees!

Easy Installation

All sensors come with batteries, adhesive strips and mounting accessories.

Expand and Customize

You have the control to expand the system and customize the settings easily.

Emergency Dialer

No Monthly Fees. Flexible to call anyone. No Terms or Contracts.

Panic Button

Wireless Panic Button provides help at your fingertips whenever you need it.

Zone Setting

Whether you are sleeping at home or out at the office, we've got you covered.

Battery Powered

Wireless sensors run on lithium and alkaline batteries, ensuring your security even when the electricity grid fails.

Portable

Easily removable. You can take it when you move.

Rolling Code Technology

Our Rolling Code system offers higher security than traditional fixed code security systems.

Great Value

Affordable wireless alarm system.

Emergency Dialer

Voice Dialer

Model: AD-105

The Voice Dialer will dial the pre-programmed telephone numbers to notify you when an alarm is triggered.

Voice Dialer with Panic Remote

Model: ED-100W

Ideal for seniors in case of emergency. Press the Panic Remote button to send a voice message to the pre-programmed numbers.

How it Works

Step 1

Arm your security system when you leave the premises.

Step 2

When a wireless sensor is triggered, the Control Panel will immediately be notified.

Step 3

The built-in loud siren will go off and the Dialer will immediately call you and play the pre-recorded message.

Step 4

Once you receive the call, you can contact the police right away.

Alarm System Kits

Based on your personal choice, select the starter kit that's right for you.
