Garage Door Opener + Accessories

Skylink Garage Door Opener + Remote Controls

Skylink residential garage door openers offer reliability and durability. They are engineered to provide ultimate safety and security. Our powerful garage door opener has a DC motor which provides extremely quiet operation compared to traditional garage door openers. For a comparison line up of our entire garage door opener line (by horsepower, drive type and more) can be found on our website.

Skylink offers a variety of garage door accessories that make your life easier by simplifying and securing your garage and home. Whether you need a backup battery to open the garage door during power outages, additional keychains, visor remotes, a keyless entry system or need a replacement, Skylink has you covered.

Universal Remote Control

Compatible with most Garage Door Openers

Skylink Universal Remote Control Products are designed to work with most national garage door opener brands in the market which provides convenient and secure access to your garage door. Skylink offers various products, such as the Keychain, Visor or Keyless Entry System with unique styles for everyone.

Universal Accessories

Skylink's universal accessories helps to improve the quality of your busy life with convenient products such as Garage Door, Motion Alerts, Automatic Garage Door Closer or Lighting Control. View our accessories online and enjoy peace of mind!

Smartphone Garage Door Control

The Skylink Garage Door Internet Hub Starter Kit will allow you to control your existing garage door opener from your Smartphone. It is compatible with almost any garage door opener. This system is also expandable with more receivers to control lightings and small appliances.

Professional Dealers

Skylink Offers special product lines and promotions for Professional Dealers. Installation is key and we can offer affordable and high quality openers to sell. Increase your sales with Skylink. Contact a Skylink representative now!

Wireless Alert / Alarm System

Be notified
of your
surrounding!

Long Range Alert Series

The Household Alert Systems are a simple and inexpensive way of bringing some peace of mind to your home. Skylink offers a variety of sensors to suit each and everyone's personal needs. From motion sensors for the driveway, to door and window sensors, we've got you covered. The Household Alert receiver offers both Alert and Alarm mode and visually shows you which zone has been triggered so you know which exact sensor has gone off. Its four zones allow you to use multiple sensors, allowing you to program four sensors to each zone.

Alert & Alarm System M-Series

The Skylink M-Series is an alert and alarm home monitoring security system. This two in one system gives every homeowner peace of mind whether they are at home or on the road. Know what's happening around your home with the Alert Mode, which will beep and visually blink whenever a sensor is triggered. Never leave your garage door open again. Be notified when someone opens the door or when strangers are near your home. Protect yourself and your loved ones when staying at home. When leaving your home, arm the system in Alarm Mode and the siren will sound when a break-in occurs. This system is user-friendly and an easy, cost-effective solution to protect your home and business. The benefits of the M-Series is that it's truly DIY, no monthly fees and has a long range capability of up to 800ft.

Wireless Alarm System

SC-Series

The Skylink Wireless Alarm System provides Complete Control of your home, business or desired premises. The systems are expandable with up to 30 accessories, enabling the owner to customize in accordance to their personal needs. The simple DIY setup allows you to easily install the system without the expense of professional assistance.

Unlike other traditional security companies, we offer a great value for a reasonable price. With the Emergency Dialer you can pre-program telephone numbers so that when the alarm goes off they will be called. The purchase of the Skylink Wireless Alarm System saves you the installation fee and the monthly service charges.

Accessories

Buying and installing a custom alarm system in your home has never been easier. You can have up to thirty different accessories including door/window sensors, motion sensors, flood sensors, vibration sensors, temperature sensors, keypads, outdoor sirens and more.

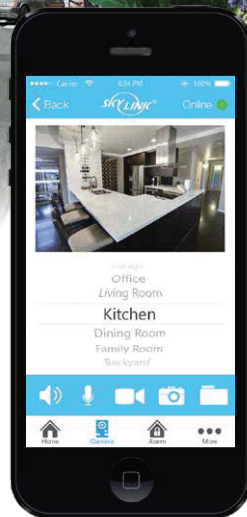

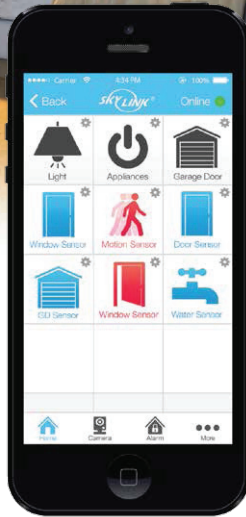

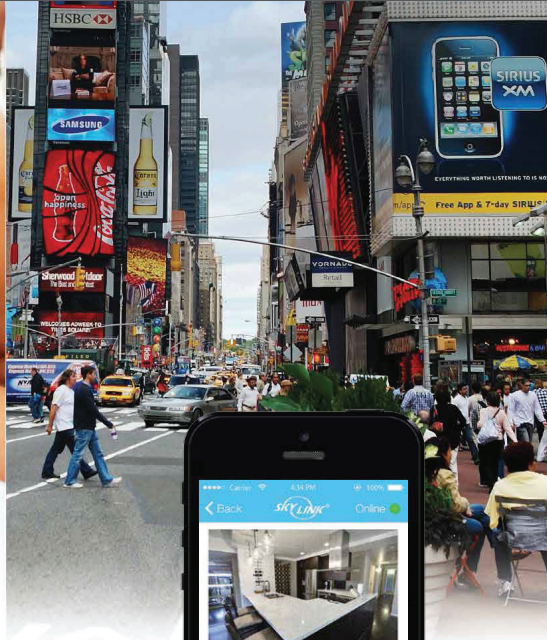

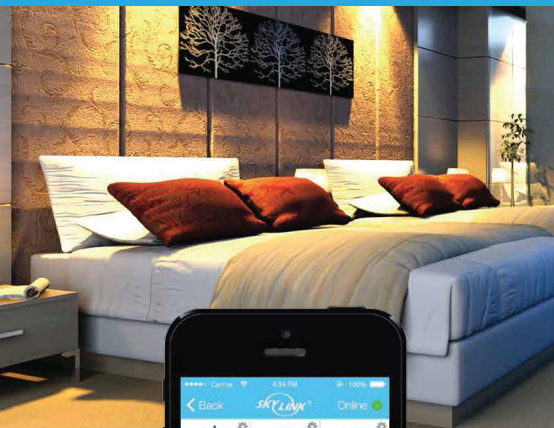

Swing Door Opener

Open or close any swinging door automatically with the press of a button. The Swing Door Opener turns any inward or outward swinging, left or right handed door into an automated door. It is also available with a magnetic lock and an electric strike for security or privacy. With three operational modes, in the event of a power failure, the door will still be able to operate manually. You can open the door with a single press of a button on the keychain remote, enter a passcode on the keypad transmitter or open the door automatically with the motion sensor.

HOME AUTOMATION

Home Automation

Home Control. Alarm System. Video Monitoring - All in One

The simple Skylink Home Automation solution provides complete control over all lighting and appliances including alarm system and video monitoring from your Smartphone.

The Internet Hub, which connects to your home's router, is the brain of the Home Automation System and coordinates the activities of all receivers and sensors. No networking knowledge required, with the Cloud Server this system is truly plug and play.

Setting up a Home Automation System is easier than you think. Just select one of our Starter Kits, install the free Skylink App and add more Skylink wireless controls to complete your system.

Receivers

Turn lights and appliances on/off, create a schedule, a scene or control it from wherever you are with the Skylink App.

Transmitters

Use Transmitters for convenient local control. Add in a Three Way Switch with the Wireless Wall Switch or add a Motion Sensor to automatically turn your lighting and appliances on/off when you enter/leave the room.

Alarm Sensors

Receive push notifications, arm disarm or trigger the Panic Button all from your Smartphone. No installation, no wiring, no monthly fees and no contract. It's really that simple!

Cameras

Monitor your home on your Smartphone wherever you are. Automatically record video when motion is detected and play it back on your Smartphone.

About Us

Skylink Group's goal is to cater to the needs and concerns of the homeowner by providing a safe and comfortable environment for their family. Established in 1990, Skylink has multiple offices, located in Brampton, Ontario, Canada, in Ontario, California, USA, in Dongguan, Guangdong, China and Hong Kong. Our Sales offices located in Canada, USA and Hong Kong globally cater the production from our fully automated manufacturing facility in China.

This growing brand is supported by our team of R&D engineers with different backgrounds and a dedicated production team in Hong Kong, who work very closely with the sales and marketing department in North America, listening to the customer and user needs to answer market requirements. Skylink's Sales Team in Hong Kong also deals with all the sales in the European market as well as any OEM/ODM projects.

We are flexible in how we work with you!

Logistics

We have two warehouses catering to North America. The warehouse in the US is located in Ontario, California and the warehouse in Canada is located in Brampton, Ontario.

Retail Ready

Our products are retail ready packaged either in clamshell or boxes. We also offer attractive display cases and other point of sale solutions.

FOB China

Skylink works hand in hand with Global Sourcing / Logistic Teams in China and Hong Kong for private label or FOB terms.

Customer Service

Our customer service team is available 5 days a week from 9:00AM to 5:00PM EST. We take pride in providing courteous and responsive support to all customers in a professional manner, ensuring that each individual has an exceptional experience. We stand behind our promise to deliver timely and quality service.

R&D

Skylink's engineering team is continuously striving to create new and innovative products, which will grasp the consumers eye. Our team is constantly taking into consideration the feedback of our customers in order to improve our products.

OEM Solutions

Skylink offers private labeling to those interested in carrying our products under their own brand.
