Skylink Garage Door Opener

Motor

The DC motor offers additional benefits with very quiet operation and much less vibration. It is ideal for garage doors that are below a living room or bedroom. The DC motor also offers the soft, start soft stop features which reduces the vibration and wear and tear of all the mechanical parts.

Features

Rolling Code Technology

An encrypted code, which is different from the previous code, is generated for every Remote activation.

Optimal Force Learnings

The microprocessor automatically sets the garage doors opening and closing forces. There is no need to set the force yourself, simply run a full cycle.

Safety Beam Sensors

Door automatically reverses if an obstacle is detected beneath the door while closing.

Soft Start, Soft Stop

Accelerates slowly to full speed and slows down before coming to a complete stop. It reduces vibration and wear and tear on all mechanical parts.

Durable Chain/Belt Drive

The Garage Door Openers are available with either the Chain or Belt Drive.

Easy to Install

The Garage Door Opener entails simple installation and programming. Installation guides and user manuals are all included.

EQ vs IQ

EQ Series

The EQ Garage Door Openers come with a wall button or wall console that includes the basic function of opening and closing the garage door and turning the light on or off.

IQ Series

The IQ Garage Door Openers come with a LCD wall console where you can do all the programming function on the wall console without climbing up the ladder.
