

Motor

Motor

The DC motor offers additional benefits with very quiet operation and much less vibration. It is ideal for garage doors that are below a living room or bedroom. The DC motor also offers the soft, start soft stop features which reduces the vibration and wear and tear of all the mechanical parts.

Features

Rolling Code Technology

An encrypted code, which is different from the previous code, is generated for every Remote activation.

Optimal Force Learnings

The microprocessor automatically sets the garage doors opening and closing forces. There is no need to set the force yourself, simply run a full cycle.

Safety Beam Sensors

Door automatically reverses if an obstacle is detected beneath the door while closing.

Soft Start, Soft Stop

Accelerates slowly to full speed and slows down before coming to a complete stop. It reduces vibration and wear and tear on all mechanical parts.

Durable Chain/Belt Drive

The Garage Door Openers are available with either the Chain or Belt Drive.

Easy to Install

The Garage Door Opener entails simple installation and programming. Installation guides and user manuals are all included.

EQ vs IQ

EQ Series

The EQ Garage Door Openers come with a wall button or wall console that includes the basic function of opening and closing the garage door, turning the light on or off, enable/disable remote lock.

IQ Series

The IQ Garage Door Openers come with a LCD wall console where you can do all the programming function on the wall console without climbing up the ladder.

Accessories

Keychain & Visor Remote

Model: MK-Series

This new sleek and stylish Keychain/Visor Transmitter is available with one, two and three buttons for the operation of multiple garage door openers. The passcode unlock feature provides additional security for the three button keychain remote.

Keyless Entry System

Model: KN-318

The Keyless Entry Pad is designed to work with Skylink garage door openers, providing the convenience of accessing your garage and home without carrying a remote control or key.

Backup Battery

Model: BA-100

The Backup Battery allows you to operate your Garage Door Openers during power outage! It is compatible with any Skylink Garage Door Opener.
