Universal Garage Door Remote Control

Compatible with any Garage Door Opener Brand!

Model:

MF-1

www.skylinkhome.com

Works with any Wall Button/Wall Console*

No matter what brand of garage door opener you have!

*(R) are registered trademarks of their respective corporations

Features

Rolling Code

Generates unique encrypted codes for enhanced security each time a signal is transmitted.

Operation Range

The operating range is up to 150 ft. in an open area.

Expandable

Add up to 16 remote controls to a Smart Receiver and control up to 3 different garage doors separately with the 3-Button Keychain Remote

Easy Installation

Simply install the Receiver over your Garage Door Wall Button/Console with just two screws.

Lost your Keychain Remote?
No Problem!

Enable the optional Passcode Protection on the Keychain Remote and enter a passcode before using it just like your Smartphone, to prevent break-in to your homes if your remote is lost or stolen.

The password can be 2-8 digits long from a combination of button 1,2 and 3.

Just like a Smartphone!
